

AirMapper™ Ecosystem

The most cost-effective Wi-Fi design, site survey & troubleshooting solution

Overview

The AirMapper Ecosystem is a suite of interoperable products that speed and simplify wired and Wi-Fi network planning, installation, validation, and troubleshooting.

NetAlly is the first to offer site survey data collection and network discovery in powerful handheld instruments, with complete infrastructure and heat mapping in the Link-Live™ collaboration, reporting, and analysis platform or AirMagnet® Survey PRO.

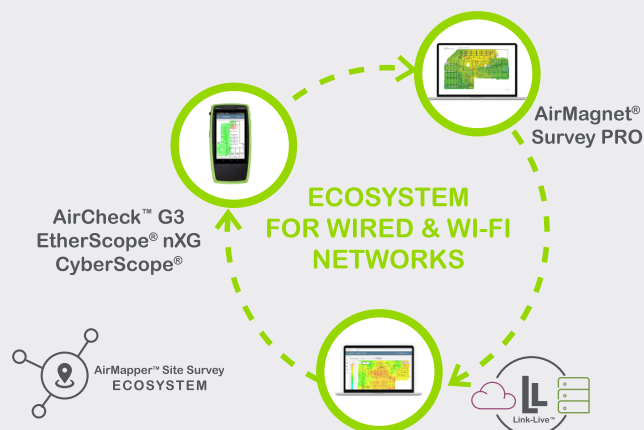

With the AirMapper Ecosystem, your team can design a Wi-Fi network with AirMagnet Survey PRO, quickly perform a validation site survey using the AirMapper app on the AirCheck® G3, EtherScope® nXG, or CyberScope® and easily collaborate through the use of the Link-Live.
