

LinkRunner® AT

COPPER AND FIBER AUTOTESTER

When network issues arise or problems installing a new device occur, time is of the essence. Our Auto Tester tests and validates copper and fiber Ethernet connectivity in less than 10 seconds, so you can pinpoint the source of the problem fast.

- User-configured Auto Tests simplify a wide range of important tasks
- Quick cable test and switch identification facilitates fast problem isolation
- Test results can be automatically uploaded to the Link-Live Cloud Service, improving collaboration between network engineers and technicians
- Creates greater job visibility, project control, and fleet management

MODELS: LRAT-1000 • LRAT-2000 • LRAT-2000-KIT • ACKG2-LRAT2000

LinkRunner® G2

ENHANCED SMART NETWORK TESTER

Supporting the growth of network connected devices can be challenging, especially when technicians rely on their own devices and a variety of apps to run diagnostics. This next-generation enhanced network diagnostic tester simplifies network validation and configuration of copper and fiber Ethernet networks, streamlining workflows by combining essential functions of installation and triage in a single, ruggedized unit.

- Automates hardware tests for Power over Ethernet (PoE), cable, VLAN, and link speed that would be difficult to conduct using laptops or mobile phones
- Improves the efficiency and effectiveness of network operations by accelerating network deployment and problem identification
- Intuitive design runs Android-based apps with smartphone-like features, empowering onsite teams to get networks up and running quickly
- Automates reporting and enables collaboration with upload and management of test results via Link-Live Cloud Service

MODELS: LR-G2 • LR-G2-KIT • LR-G2-LS-KIT • LR-G2-ACKG2-CBO

LinkRunner® 10G

ADVANCED 10GIG ETHERNET TESTER

With network bandwidth demands increasing, gaining visibility into choke points and latency and packet loss issues is more important than ever. Quickly test, verify, and troubleshoot line-rate 1Gig, Multi-Gig and 10Gig Ethernet with our cost-effective, handheld, multi-function tester.

- Delivers complete network validation, troubleshooting, and documentation; accelerates deployments, speeds problem identification, and improves the efficiency and effectiveness of network installers and operations teams
- Serves as a peer to the EtherScope nXG for line-rate bandwidth performance testing to prove network capacity, performance and QoS, as well as service provider SLAs between sites
- AllyCare enables in-depth network discovery and web remote control; upload discovery data to Link-Live for instant topology mapping of your wired and Wi-Fi networks
- Line-rate capture up to 10Gbps ensures you never miss a packet for in-depth analysis
- Optional USB Wi-Fi adapter enables instant upload of test results to Link-Live and remote control

MODELS: LR10G-100 • LR10G-100-KIT • EXG-LR10G-KIT
