Introduction

AirMagnet Planner enables you to accurately plan and design 802.11a/b/g/n/ac/ax wireless networks without physically rolling out any Access Point (AP). AirMagnet Planner accounts for building materials, obstructions, access point configurations, antenna patterns and many other variables to provide a reliable predictive map of Wi-Fi signal and performance. The solution offers superior predictive modeling to determine ideal quantity, placement, and configuration of APs for optimal security, performance, and compliance. This *Release Notes* highlight issues addressed in the 10.3.1 release in addition to the new features. It also provides basic instructions and important notes regarding the installation and operation of the software.

Special Notes

- You must uninstall any previous version of AirMagnet Planner using the Control Panel before installing the released version of AirMagnet Planner 10.3.1. Do not use the 'Repair' function. Using Repair has resulted in unreliable performance in some versions of Windows.
- Note when installing on Windows 8, 8.1, or 10, it is highly recommended to install all available Microsoft updates before installing and running AirMagnet Planner.
- AirMagnet Planner 8.8 and later releases use the *.svdx* file extension for survey data files, which is different from the *.svd* file extension used in all previous releases. **It is important to note that you cannot open .svdx files in any previous version of AirMagnet Planner. If you have done a plan using AirMagnet Planner 8.8 or later, you MUST open the survey data (.svdx) file in AirMagnet Planner 8.8 or later.** You can still open or import Planner projects and data files saved in *.svd* format from earlier versions of the application. However, when you open an *.svd* file for the first time in AirMagnet Planner 8.8 or later, the application will first convert the file to the new *.svdx* file format.

The conversion may take longer than just opening a file. You can view the progress of the conversion from the progress bar at the bottom of the screen.

- You must have a Cisco “Plus” license to use the Cisco Prime Infrastructure feature.

New Features in v10.3.1

- AutoCAD File Support Improvements2

AutoCAD File Support Improvements

This release includes multiple improvements to the way AirMagnet Survey PRO handles AutoCAD files. It adds support for newer versions of CAD drawings and improves the performance of the Automatic Wall Extraction tool.

Please be aware of the following while using this enhanced functionality:

- The new improvements do not apply to the extract to AutoCAD option (to be included in a future release).

Bug Fixes

This section covers the defects that have been fixed in this release.

Planner 10.3.1 Release

Defect ID	Description
173426405	Create CAD failed error.
176894293	'Planner Wall Initialization' error while using Automatic Wall Extraction.
177292399	Multiple user guide updates and corrections.

Known Issues

This section documents the major known issues with this AirMagnet Planner 10.3.1 release.

Defect ID	Description
170134584	<p>User interface issues with high resolution displays.</p> <p>Workaround: If running a 4K display on Windows 10 build 1803 or higher, do the following:</p> <ul style="list-style-type: none"> ▪ Navigate to the install folder: C:\Program Files (x86)\AirMagnet Inc\AirMagnet Surveyor ▪ Right-click the file “Surveyor.exe” and select “Properties” ▪ Select the “Compatibility” tab ▪ Select the option to “Change high DPI settings” ▪ Enable the “Override high DPI scaling behavior” ▪ Select “Scaling performed by: System” ▪ Click “OK” on all open windows to apply changes <p>Note: If you do not find this setting, either you are not on the 1803 build or do not have a 4K monitor. If that is the case lower the display resolution to 1920 x 1080.</p>

Defect ID	Description
176064752	Multi-Floor Planner: Unable to move an AP that is in a defined coverage area.

System Requirements

Laptop and Tablet PC

- Operating Systems: Microsoft Windows 8 Pro/Enterprise 64-bit, Microsoft Windows 8.1 Pro/Enterprise 64-bit, or Microsoft Windows 10 Pro/Enterprise 64-bit.
- Intel® Core™ 2 Duo 2.00 GHz (Intel® Core™ i5 or higher recommended).
- 4 GB memory or higher.
- 800 MB free HDD or SSD space.

Apple® MacBook® Pro

- Operating Systems: MAC OS X v10.9 or higher running a supported Windows OS (as noted under the Laptop and Tablet PC section) using Boot Camp®.
- Intel®-based CPU 2.0 GHz or higher.
- 4 GB memory or higher.
- 800 MB free HDD or SSD space.

Supported Site Map Image Formats

.bmp, .dib, .dwf, .dwg, dxf, .emf, .gif, vsd, .jpg, .wmf, .vdx, and .png.

Release History

Release Month	Release Version
07/2020	AirMagnet Planner 10.0.0
12/2020	AirMagnet Planner 10.1.0
01/2021	AirMagnet Planner 10.2.0
05/2021	AirMagnet Planner 10.3.0
07/2021	AirMagnet Planner 10.3.1

Technical Support
